

Artistic Concrete Group

We specialize in stamped concrete and other decorative concrete techniques for both commercial and residential projects. Residential spaces such as pool decks, patios, walkways and driveways can be enhanced by our stamped concrete system and the many other techniques Artistic Concrete Groups perfected.

Today Artistic Concrete Group continues to move forward by offering a full suite of value-added services to our customers. Established for over 30 Years, serving Miami-Dade and Broward counties. We operate State-of-the-art technology in our computerized concrete plant. A well-stocked warehouse, with a variety of products to serve our customer's needs and preferences. Large selection of designs, colors and textures. Well-trained and experienced crews. Courteous office personnel to ensure customer satisfaction.

Our dedication to quality, combined with the characteristic beauty and strength of our products, make our slogan a reality: It's not an expense; It's an investment! And yes, we remain customer service fanatics.

Why choose Artistic Concrete?

- We are the most experienced decorative concrete company in south Florida with over 33 years of experience!
- Our crew operates with the upmost professionalism with bilingual abilities to assist everyone.
- We have our own concrete plant, which eliminates the hassle of outsourcing our work.
- We only use the latest up to date construction technology and Eco friendly products.
- We give you peace of mind on your investment.
- Every Project is 100% handcrafted, no two projects are identical. That makes your project 100% original!
- We don't subcontract our work. We are with you from the first shovel scoop to the last sealer applied to your finished project.

We use Stamped Concrete

This is one of the original decorative concrete methods to add a pattern or texture into a freshly placed concrete slab. There is a reason this finish has created a concrete revolution.

The Process of Stamped Concrete

Stamped Concrete is the process of pressing decorative or natural impressions into wet concrete using rubber stamps. This is a great way to add a unique flair to your driveway, pool deck, patio, walkway or walls. There are many benefits to using stamped concrete. Concrete is one of the most durable building materials available for paving, which comes in handy in high traffic areas such as driveways and walkways.

Choosing stamped concrete over other paving materials such as natural stone can be a more economical choice. Done right, stamped concrete can look just as high quality as these other methods. For instance, a stamped concrete job can be installed in a portion of the time as natural materials takes, which allows contractors to be more productive.

The biggest advantage to stamped concrete is the flexibility. Concrete stamping, combined with different finishing techniques, allows for unlimited design opportunities such as aged cobblestones, brickwork, flagstones, slate tile, marble, granite, wood, or just about any natural surface.

Our Process

Phase 1 - Excavation and Removal.

Phase 2 - Installation of Forms and wire mesh.

Phase 3 - Concrete is poured and smoothed.

Phase 4 - Color hardeners are applied. Concrete is stamped.

Phase 5 - Expansion joints are installed to minimize cracks

Phase 6 - Sealer is applied to protect and enhance the finished product.

Contact us today for your free consultation.

Not only will you get a free estimate with your consultation, Our representative will also conduct a complete evaluation of the area where you want to install the Concrete and recommend the best type and style to match your home's landscaping and your budget.
